## M. Sc. DEGREE END SEMESTER EXAMINATION - OCTOBER 2024

## **SEMESTER 3 : PHYSICS**

## COURSE : 21P3PHYT10 : COMPUTATIONAL PHYSICS

(For Regular 2023 Admission and Supplementary 2022/2021 Admissions)

| Duration | : | Three Hours |  |
|----------|---|-------------|--|
|----------|---|-------------|--|

Max. Weights: 30

|     | PART A<br>Answer any 8 questions   | Weight: 1    |  |  |  |  |
|-----|--|--------------|--|--|--|--|
| 1.  | Write down the general expression of 2 <sup>nd</sup> order linear PDE and arrive at the cases when the equation leads to elliptical, hyperbolic and parabolic type   | (U, CO 4)    |  |  |  |  |
| 2.  | 2. How does power method works in determination of the dominat Eigen value?  |              |  |  |  |  |
| 3.  | Discuss least square method for fitting a parabola.  | (U, CO 1)    |  |  |  |  |
| 4.  | Differentiate Euler and modified Euler method  | (U, CO 3)    |  |  |  |  |
| 5.  | <ol> <li>Comment on the statement with valid reason: In the finite difference<br/>language, a central difference approximation is better way compared to<br/>forward or backward way of representing partial derivative (say T<sub>x</sub>)</li> </ol> |              |  |  |  |  |
| 6.  | Write a short note cubic spline method.  | (E)          |  |  |  |  |
| 7.  | Discuss least square method for fitting an exponential curve.  | (U, CO 1)    |  |  |  |  |
| 8.  | Discuss truncation and rounding off errors in Numerical differentiation.   | (U, CO 2)    |  |  |  |  |
| 9.  | 9. How can one numerically obtain the lowest Eigen value of a matrix and its corresponding Eigen vector.   |              |  |  |  |  |
| 10. | 10. Write down the Taylor Series expansion for a function of two variable.   |              |  |  |  |  |
|     | PART B   |              |  |  |  |  |
|     | Answer any 6 questions   | Weights: 2   |  |  |  |  |
| 11. | Integrate the function f(x)=sqrt(1+x <sup>2</sup> ) within the limit 1 to 5 using Trapezoidal rule   | (A, CO 2)    |  |  |  |  |
| 12. | Write down the Taylor Series expansion for a function of one variable.   | (U, CO 1)    |  |  |  |  |
| 13. | Given the set of values:   |              |  |  |  |  |
|     | x101520253035y19.9721.5122.4723.5224.6525.89   | (A, CO 1)    |  |  |  |  |
| 14. | Form the difference table and write down the values of $\Delta^2 y_{10}$ , $\Delta^5 y_{10}$<br>From the following table of values of x and f(x), determine f(0.23)<br>x:: 0.20 0.22 0.24 0.26 0.28 0.30   | (A, CO 1)    |  |  |  |  |
|     | f(x):: 1.6596 1.6698 1.6804 1.6912 1.7024 1.7139   |              |  |  |  |  |
| 15. | The velocities of a car (running on a straight road) at intervals 2 minutes are given below:<br>Time in min:: 0 2 4 6 8 10 12<br>Vel km/Hr:: 0 22 30 27 18 7 0<br>Apply Simpson's rule to find the distance covered by the car                         | (A, CO 2)    |  |  |  |  |
| 16. | Solve the following system of linear equation by Gauss Elimination with<br>Pivoting: $2x + 2y + z = 6$ ; $4x + 2y + 3z = 4$ ; $x - y + z = 0$  | (A, CO 3)    |  |  |  |  |
| 17. | Obtain the Eigenvalues of the matrix A using Jacobi-Method. A is given as (15 1 1 ; 1 -2 6 ; 1 6 1)  |              |  |  |  |  |
|     |  | (A, CO 3)    |  |  |  |  |
| 18. | Use power method to approximate a dominant Eigenvalue and the corresponding $\begin{bmatrix} 4 & -5 \end{bmatrix}$   | (A, CO 3)    |  |  |  |  |
|     | Eigenvector of A = $\begin{bmatrix} 4 & -5 \\ 2 & 3 \end{bmatrix}$ correct to 2-significant figures  |              |  |  |  |  |
|     |  | (2 x 6 = 12) |  |  |  |  |

|     | PART C   |                                  |  |  |  |  |
|-----|--|----------------------------------|--|--|--|--|
|     | Answer any 2 questions   | Weights: 5                       |  |  |  |  |
| 19. | Discuss Euler and estimate its leading error term.   | (U, CO 3)                        |  |  |  |  |
| 20. | Discuss in detail Buffon's needle problem and how it can be used in the evaluation of pi.                          | (U, CO 4)                        |  |  |  |  |
| 21. | Discuss Least-Squares curve fitting procedures for fitting a straight line, parabola, power and exponential curves | (U, CO 1)                        |  |  |  |  |
| 22. | Discuss Simpson's 3/8 method and error associated with it.   | (U, CO 2)<br><b>(5 x 2 = 10)</b> |  |  |  |  |

## OBE: Questions to Course Outcome Mapping

| СО   | Course Outcome Description   | CL | Questions                   | Total<br>Wt. |
|------|--|----|-----------------------------|--------------|
| CO 1 | Apply the concept of curve fitting and interpolation   | A  | 3, 7, 10, 12, 13,<br>14, 20 | 14           |
| CO 2 | Understand the concepts of Numerical Differentiation and<br>Integrations and should be able to develop algorithms for the same | E  | 8, 11, 15, 21               | 10           |
| CO 3 | Solve Ordinary Differential Equations and linear set of equations using numerical methods.                                     | A  | 2, 4, 9, 16, 17,<br>18      | 12           |
| CO 4 | Solve Partial Differential Equations using numerical methods and understand the concepts of random numbers.                    | A  | 1, 5, 19                    | 7            |

Cognitive Level (CL): Cr - CREATE; E - EVALUATE; An - ANALYZE; A - APPLY; U - UNDERSTAND; R - REMEMBER;
